Region partition system of Australia

States and territories

- ACT: Australian Capital Territory
- NSW: New South Wales
- NT: Northern Territory
- QLD: Queensland
- SA: South Australia
- TAS: Tasmania
- VIC: Victoria
- WA: Western Australia

ASGS (Australian Statistical Geography Standard) The Main Structure of the Australian Statistical Geography Standard is used to disseminate a broad range of Australian Bureau of Statistics social, demographic and economic statistics, as well as being widely used by other organisations. It is broadly based on the concept of a **functional area**. - SA1 (Statistical Area Level 1): smallest unit for the release of census data - SA2: built from SA1 - SA3: built from SA2, 358 of them across Australia - SA4: built from SA3

Postal Areas (ABS 2016)

Data from sudo:

- ABS (Bureau of Statistical):
 - Demography
 - * SA3 census population data (2011-2019):
 - % of non-citizenship
 - #, % of working-age population
 - median age
 - internal, overseas migration
 - % of born overseas
 - population density
 - income
 - * SA3 census income data (2014-2018)
 -
 - jobs
 - Building Approvals

- * LGA Building Approvals 2012-2013
 - no of new houses
 - no of new other residential buildings
 - total dwelling number
 - value of alterations
 - value of new houses
 - value of new other residential building
 - value of total residential building
- Migrations

Data issue:

- How to align SA partition with LGA partition
